

DPTMS

Unexploded Ordnance Safety Program UXO

UXO Brief

What is an UXO

UXO Stand for Unexploded Ordnance

Ordnance is what we call ammunition, such as:

- Bullets, Bombs, duds, grenades, blasting caps, shells, and fuses

Unexploded ordnance is:

- Ammunition that was fired but didn't explode
- Ammunition that could explode
- New or old...shiny or Rusty...Clean or Dirty

And if it is dangerous!!!

DPTMS

UXO can be found in many shapes, sizes, and types.

- **Size doesn't matter. Small items can kill or injure.**
- **Age doesn't matter. Old rusty items can kill or injure.**
- **Items may not look bad, but they are dangerous!**

DPTMS

Examples of UXO

Length = approx. 4 to 4.5 inches
Diameter = approx. 1.5 inches

DPTMS

DPTMS

**Length = approx. 2
feet**
**Diameter = approx. 4
inches**
